SELF-CLINCHING STANDOFFS

BULLETIN **SO**

# SELF-CLINCHING STANDOFFS

PEM® self-clinching standoffs, which use the proven self-clinching design, provide ideal solutions for applications where mounting, spacing or stacking of panels, boards or components are required. Pressed into round holes, these fasteners mount permanently into metal sheets as thin as .025"/0.63mm.

PEM® self-clinching standoffs are also available on special order in non-heat treated carbon steel as Type SON (through hole threaded) or BSON (blind threaded).

For more information on the proper use of PEM self-clinching standoffs, check our web site for Tech Sheet PEM® - REF/Standoff Basics.

<p><b>Types SO/SOS/SOA through hole threaded</b> self-clinching standoffs for attachment and spacing of panels, boards or components - <b>PAGE 3</b></p>		<p><b>Types TSO/TSOS/TSOA</b> Through hole threaded standoffs <b>for clinching into thinner sheets</b> than SO/SOS/SOA types. Install into sheets as thin as .025"/0.63mm. Also, threaded at the barrel end minimizing length of screw required - <b>PAGE 6</b></p>	
<p><b>Types BSO/BSOS/BSOA Blind hole, threaded</b> self-clinching standoffs for attachment and spacing of panels, boards or components where flush, closed end is required for smooth panel appearance - <b>PAGE 4</b></p>		<p><b>Types DSOS/DSO</b> Through hole, threaded standoffs with round, knurled head <b>allowing closer-to-edge clinch installation</b> for attachment and spacing of panels, boards or components - <b>PAGE 7</b></p>	
<p><b>Types SO/SOS/SOA Through hole, unthreaded</b> self-clinching standoffs for stacking and spacing multiple boards or panels - <b>PAGE 5</b></p>		<p><b>Types SOSG/SOAG</b> Through hole, threaded grounding standoffs with <b>"gripping teeth" on end of barrel</b> for firm contact of attached PC board - <b>PAGE 7</b></p>	
<p><b>Types SO4/BSO4</b> Threaded blind hole, through hole threaded and unthreaded versions specifically designed <b>for clinching into stainless steel sheets</b> - <b>PAGES 3 (Type SO4) and 4 (Type BSO4)</b></p>		<p><b>Material and finish specifications - PAGE 8</b></p> <p><b>Installation - PAGES 8 &amp; 9</b></p> <p><b>Performance data - PAGES 10 &amp; 11</b></p>	

Always look for the "One Groove" or "Two Groove" registered trademarks to be sure you are getting genuine PEM® brand standoffs. On actual parts, location of grooves on barrel may be different than shown in photo.

One groove identifies standoffs for installation into stainless steel.

(2) See PEM Technical Support section of our web site for related plating standards and specifications.

(3) HRB - Hardness Rockwell "B" Scale. HB - Hardness Brinell.

## INSTALLATION

### TYPES SO/SOS/SOA/SO4/BSO/BSOS/BSOA/BSO4

1. Prepare properly sized mounting hole in sheet. Do not perform any secondary operation such as deburring.
2. Insert standoff through mounting hole (preferably the punch side) of sheet and into anvil as shown in drawing.
3. With installation punch and anvil surfaces parallel, apply only enough squeezing force to embed the standoff's head flush in the sheet. Drawing at right shows suggested tooling for applying these forces.

\*See pages 3 & 4 for "C" and "L".

+0.004" to +0.007" / +0.1mm to +0.18mm

### PEMSERTER® Installation Tooling

## INSTALLATION

### TYPES TSO/TSOS/TSOA

1. Prepare properly sized mounting hole in sheet. Do not perform any secondary operation such as deburring.
2. Insert standoff through mounting hole (preferably the punch side) of sheet and into anvil as shown in drawing.
3. With installation punch and anvil surfaces parallel, apply only enough squeezing force to embed the standoff's head flush in the sheet. Drawing at right shows required installation anvil for sheet thickness of .025" to .032"/0.63 to 0.81mm. A chamfered anvil is not required for sheets over .032"/0.81mm.

REQUIRED INSTALLATION ANVIL FOR SHEETS BELOW .032" / 0.81MM

(1) The values reported are averages when all installation specifications and procedures are followed. Variations in mounting hole size, sheet material and installation procedure will affect results. Performance testing of this product in your application is recommended. We will be happy to provide samples for this purpose.

(2) Joint failure in torque-out and pull-thru will depend on the strength and type of screw being used. In some cases the failure will be in the screw and not in the self-clinching standoff. Please contact our Applications Engineering group with any questions.
